This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

GMELIN'S HANDBOOK

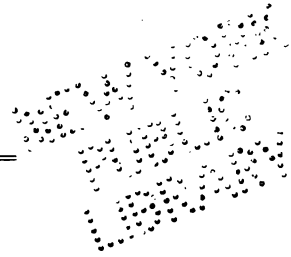
OF

CHEMISTRY.

BY

HENRY WATTS, B.A., F.R.S., F.C.S.,

Editor of the Journal of the Chemical Society.



LONDON:

HARRISON, 59, PALL MALL,

BOOKSELLER TO HER MAJESTY, AND H.R.H. THE PRINCE OF WALES.

1872.

APR 20 1977

LONDON:
HARRISON AND SONS, PRINTERS IN ORDINARY TO HER MAJESTY ST. MARTIN'S LANE.

INDEX

TO

GMELIN'S HANDBOOK OF CHEMISTRY.

N.B. *The figures in thick type denote the volumes.*

A.

Abies balsamea, Turpentine from.... .... **18**, 19
Abies excelsa, Oil from the seeds of **16**, 316
„ Turpentine from **18**, 18
Abies pectinata, Turpentine from **18**, 18
Abietate of Ethyl **18**, 7
Abietates, metallic **18**, 5
Abietic acid, formation of Sylvic acid from **17**, 318
Abietic Anhydride **18**, 8
Abietin **18**, 7, 18
Abietinic Acid **18**, 18
Absolute strength of Affinity **1**, 136
„ zero of Heat **1**, 302
Absorbent earths **3**, 133
Absorption, compounds formed by **1**, 86
„ of Heat **1**, 213
„ Heat accompanying vaporization **1**, 272
„ Light **1**, 165
Absynthiin **17**, 354
Acacia, Oil of **14**, 356
Acechloride of Platinum **9**, 31
Acediamine **12**, 546
Acediamine: Hydrochlorate **13**, 535
Aceite d'Amacey **14**, 356
Acephalæ, Byssus of **18**, 372
Acephoric Acid.... .... **9**, 6
Acephosgenic Acid **9**, 7
Aceplatinous Oxide **9**, 37
Acetal **9**, 38; **12**, 519; **13**, 452, 455, 476
„ formation of Aldehyde from **13**, 437
Acetamidate of Mercury **12**, 545
„ Silver **12**, 545
Acetamide **9**, 246; **13**, 535
Acetamide, compounds of **12**, 543
„ preparation of, from acetate of ammonia **12**, 543
„ with Biacetamide **12**, 546
Acetanilide **11**, 314
Acetate, Acetic.... .... **8**, 334
„ of Allyl.... **10**, 543; **13**, 544
„ Alumina **8**, 303; **13**, 443
„ Amarine **12**, 197
„ Ammonia **8**, 294
„ Amyl **11**, 69
„ Aniline **11**, 262
„ Atropine **16**, 455
„ Auric **8**, 334
„ of Baryta **8**, 301
„ Benzidine **11**, 340
„ Benzyl **12**, 52
„ Benzylene **12**, 224
„ Berberine **17**, 195
„ Biamidobenzoic Acid **12**, 150
„ Bichloromethylic **9**, 231
„ Bichlorovinic **9**, 235
„ of Bismuth **8**, 308
„ Butyl **10**, 107
„ Cadmium **8**, 310
„ Capryl **13**, 200, 587
„ Cerium **8**, 303
„ Cetyl **16**, 375
„ Chelerythrine **17**, 159
„ Chelidonine.... .... **17**, 166
„ Cholesteryl **18**, 117
„ Chromic **8**, 306
„ Chromous **8**, 305
„ of Cinchonidine **17**, 227, 229, 613
„ Cinchonine **17**, 216
„ Cobalt **8**, 322
„ Cocaine **16**, 303
„ Codeine **17**, 36

Acetate of Corydaline 17, 609
„ Cuminic 14, 156
„ of Cumoglycol 14, 153
„ Cumylene 14, 153
„ Cupric oxide 8, 323
„ Cupric oxide and ammonia 8, 326
„ Cupric oxide and lime 8, 328
„ Cupric, with mercuric chloride 8, 332
„ Cuprous 8, 323
„ of Cyanethine 13, 237
„ Ethyl 8, 493
„ Ethyl, action of terchloride of phosphorus on 10, 488
„ Ethyl, decomposition of, by potassium 8, 499
„ Ethylene 12, 502
„ Ethylene, basic ? 13, 430
„ Ethylstrychnine 17, 512
„ Ferric 8, 320; 13, 446
„ Ferroso-ferric, use of crude, for steeping wood 7, 113
„ Ferrous 8, 320
„ of Furfurine 10, 381
„ Glucina 8, 303
„ Glycol 12, 502
„ Gold 8, 334
„ Harmaline 16, 119
„ Harmine 16, 107, 111
„ Hydrargethyl 10, 532
„ Iron 8, 320
„ Iron, action of heat on 10, 512
„ Jamaïcine 17, 315
„ Lanthanum....8, 303; 12, 512
„ Lead 8, 310, 316
„ Lead, neutral, compound of, with anacardate of lead 17, 521
„ Lead, neutral, electrolysis of 1, 103
„ Lime 8, 302
„ Lithia 8, 300
„ Magnesia 8, 303
„ Manganous 8, 308
„ Mercuric 8, 332
„ of Mercuric oxide and ammonia 8, 332
„ Mercuric, with mercuric cyanide 8, 332
„ Mercurous 8, 330
„ of Mercurous oxide and ammonia 8, 332
„ Methyl 8, 484
„ Methylene 13, 392
„ Methylstrychnine 17, 519
„ Molybdenum 8, 305
Acetate of Morphine 16, 434
„ Narcotine 15, 145
„ Nickel 8, 323
„ Nicotine 14, 231
„ Nitroharmaline 16, 125
„ Oxyacanthine 17, 199
„ Phloramine 15, 71
„ Perchloromethylic 9, 233
„ Perchlorovinic.... .... 9, 240
„ of Picoline 11, 271
„ Platinous 8, 334
„ of Potash 8, 297
„ Potash, emission of light in the crystallisation of.... .... 1, 208
„ Quadrichlorovinic 9, 238
„ of Quinidine 17, 301
„ Quinine 17, 289
„ Quintichlorovinic 9, 238
„ of Rhodium 8, 334
„ Salicylous acid 12, 245
„ Septichlorovinic 9, 239
„ Sextichlorovinic 9, 238
„ of Silver 8, 333
„ Solanine 18, 97
Acetates of Soda 8, 299
Acetate of Soda with mercuric cyanide 8, 333
„ Stannethyl 9, 99
Acetates, Stannous and Stannic 8, 310
Acetate of Stibethyl 10, 527
„ Stibmethylethylium.... 13, 502
„ Strontia 8, 302
„ Strychnine 17, 502
„ Sycoceryl 17, 44
„ Terchloromethylic 9, 232
„ Terchlorovinic.... .... 9, 237
„ of Thorina 8, 305
Acetates of Tin.... .... 8, 310
„ Titanium 8, 305
Acetate, Uranic 8, 306
„ Uranous 8, 306
Acetates of Uranium, double, 8, 307, 320, 333; 13, 442
Acetate of Vanadium 8, 305
„ Yttria 8, 303
„ Zinc 8, 308
„ Zinco-uranic 8, 310
„ of Zirconia 8, 305
Acetates, Metallic 8, 294
Acetic Acetate 5, 321
Acetic Acid 12, 512
„ aqueous 8, 293
„ anhydrous 8, 334
„ combinations of 8, 291
„ decompositions of 8, 291
„ expansion of, by heat 1, 231
„ formation of 8, 283

Acetic Acid, formation of Marsh-gas by heating, with a fixed alkali 7, 252
„ glacial, impurities of 8, 287
„ glacial, percentage of, in aqueous acetic acid 8, 293
„ glacial, preparation of 8, 287
„ glacial, properties of 8, 290
„ impurities in 8, 289
„ literature of 8, 282
„ natural formation of 13, 442
„ occurrence of, in turpentine-water 13, 442
„ preparation 8, 284
„ production of Methyl by electrolysis of.... .... 7, 247
„ sources of 8, 283
„ supposed relative position of atoms in 7, 33
„ synthesis of 13, 442
Acetic Anhydride 8, 334
„ compound of with Aldehyde 13, 440
Acetic Ether 8, 493
„ action of Chlorine on 13, 534
Acetic Salicylate 12, 282
Acetin 9, 496
Acetins, Glycolic 13, 429
Aceto-arseniate, Cupric 8, 329
Aceto-benzoate of Lead 12, 42
Acetobenzoic Ether 12, 52
Acetobenzolic Ether 12, 223
Acetobutyrate of Ethylene 13, 433
Acetobutyrin, Glycolic 13, 433
Acetochlorhydrin 9, 498; 13, 579
Acetochlorobromhydrin 13, 580
Aceto-cinnamic Anhydride 13, 293
Acetocuminic Anhydride 14, 156
Acetodichlorhydrin 13, 579
Acetoglucose 15, 331
Acetokinate of Lead 16, 231
Acetomannitan.... .... 15, 375
Acetomyristate of Lead 16, 213
Acetone 9, 1
„ and Ammonia, with Tannic acid.... .... 15, 472
„ bichlorinated.... .... 13, 464
„ brominated 13, 464
„ combinations of 9, 16
„ compound of, with bisulphite of ammonia 13, 469
„ compounds of, with alkaline bisulphites 10, 522
„ constitution of 9, 4; 13, 462
„ decomposition of, by ammonia 9, 10
Acetone, decomposition of, by ammonia and sulphide of carbon 9, 14
„ decomposition of, by ammonia and sulphur 9, 12
„ decomposition of, by ammonia and sulphuretted hydrogen 9, 14
„ decomposition of, by bichloride of platinum 9, 10
„ decomposition of, by bichromate of potash 9, 10
„ decomposition of, by bromine 9, 5
„ decomposition of, by chlorine 9, 4
„ decomposition of, by combustion.... .... 9, 4
„ decomposition of, by hydrate of potash 9, 14
„ decomposition of, by hydrochloric acid 9, 8
„ decomposition of, by iodic acid 9, 8
„ decomposition of, by iodine and phosphorus 9, 9
„ decomposition of, by nitric acid 9, 8; 13, 468
„ decomposition of, by oil of vitriol 9, 8
„ decomposition of, by pentachloride of phosphorus 9, 9; 13, 468
„ decomposition of, by phosphoric acid 9, 9
„ decomposition of, by phosphorus.... .... 9, 5
„ decomposition of, by potassium and sodium 9, 15; 13, 469
„ decomposition of, by quick lime 9, 16; 13, 471
„ decomposition of, by red heat 9, 4
„ expansion of, by heat 1, 231
„ formation of 9, 1
„ formation of Marsh-gas by heating with a fixed alkali 7, 252
„ Hexchlorinated 9, 5; 13, 467
„ insoluble compound of, containing carbon and phosphorus 9, 7
„ Monochlorinated 13, 463
„ Pentachlorinated 9, 5; 13, 465
„ preparation of 9, 1
„ properties of 9, 3
„ solution of Turpentine oil in 14, 271

Acetone, solution of Volatile oils in 7, 169
„ Trichlorinated 13, 465
Acetones 7, 44, 214
Acetonic acid 9, 37; 13, 473
Acetonine 9, 10; 13, 378
Acetonitrate of Baryta 13, 443
Acetonitrate of Strontia 13, 443
Acetonitrile 9, 294
„ action of fuming sulphuric acid on 12, 485
„ preparation of 12, 542
„ relation of, to Fulminic acid 12, 553
Acetonyl 9, 14
Acetonylamide 9, 14
Acetopropionate of Silver 9, 408
„ of Soda 9, 405

„ composition of 18, 324
„ constitution of, according to Bouchardat 18, 323
„ dissolved in dilute hydrochloric acid, action of yeast upon 18, 327
„ of gluten 18, 441
„ insolubility of, in alcohol 18, 330
„ of maize 18, 441
„ modified 18, 321
„ occurrence of, in blood 18, 319
„ oxidation of 18, 324
„ preparation and properties of 18, 323
„ putrefaction of 18, 327
„ pure 18, 321

Fibrin, reaction of, with acetic acid 18, 326
„ reaction of, with ammonia 18, 327
„ reaction of, with chlorine-water 18, 325
„ reaction of, with citric acid 18, 327
„ reaction of, with ferrocyanide of potassium 18, 329
„ reaction of, with hydrochloric acid 18, 326
„ reaction of, with nitric acid 18, 326
„ reaction of, with peroxide of hydrogen 18, 325
„ reaction of, with platinocyanide of potassium 18, 329
„ reaction of, with oil of vitriol.... .... 18, 325
„ reaction of, with potash 18, 327
„ reaction of, with tartaric acid 18, 327
„ reactions of, with lead, copper, mercury, and silver salts 18, 329
„ reactions of, with neutral salts of alkali-metal 18, 328
„ reactions of, with water 18, 325
„ soluble 18, 320
„ vegetable 18, 423, 451

HARRISON AND SONS, PRINTERS IN ORDINARY TO HER MAJESTY, ST. MARTIN'S LANE.

GMELIN'S CHEMISTRY.

The Concluding Volume (the 18th) of the

HAND-BOOK OF CHEMISTRY,

Translated and Edited by

HENRY WATTS, B.A., F.R.S.,

Is now ready.

HARRISON AND SONS,

BOOKSELLERS TO HER MAJESTY AND H.R.H. THE PRINCE OF WALES,

59, PALL MALL, LONDON, S.W.

October 20, 1871.

MESSRS. HARRISON and SONS have to announce that, in accordance with the arrangements made with the Council of the Cavendish Society, they have completed the above important work.

Subscribers are informed that this, the concluding volume, together with the Index, will be forwarded to all those who have paid their subscription for the year 1864.

Several of the volumes being now out of print, and others very scarce, subscribers desirous of completing sets are requested to make early application.

Messrs. Harrison and Sons are enabled to offer, for a limited period, complete sets of the Organic Chemistry (12 volumes) for Four Guineas, or separate volumes at 10*s.* 6*d.* each.

59, *Pall Mall, London, S.W.*

CAVENDISH SOCIETY PUBLICATIONS.

THE following Works can now be had of HARRISON and SONS, 95, Pall Mall, at the prices affixed:—

HAND-BOOK OF CHEMISTRY, by LEOPOLD GMELIN, translated and edited by HENRY WATTS, B.A., F.R.S.

INORGANIC CHEMISTRY. 6 vols., demy 8vo, cloth. Some of these volumes are out of print. A new edition of vol. 1, and a few of vols. 4, 5, and 6, can be had to complete sets, 10*s.* 6*d.* each.

ORGANIC CHEMISTRY. 12 vols., demy 8vo, cloth, complete for £4 4*s.*; separate vols., 10*s.* 6*d.*

LIFE AND WORKS OF CAVENDISH, by Dr. GEORGE WILSON. 1 vol., demy 8vo, cloth 7*s.*

LIFE AND SCIENTIFIC RESEARCHES OF DALTON, by Dr. W. C. HENRY. 1 vol., demy 8vo, cloth, 7*s.*

LAURENT'S CHEMICAL METHOD, translated by Dr. OLDING, F.R.S. 1 vol., demy 8vo, cloth, 7*s.*

ELEMENTS OF CHEMICAL AND PHYSICAL GEOLOGY, by GUSTAV BISCHOF, Ph.D. Edited, and in part translated from the Manuscript of the Author, by BENJ. H. PAUL, Ph.D. 3 vols., demy 8vo, cloth, £1 11*s.* 6*d.*

LEHMANN'S PHYSIOLOGICAL CHEMISTRY, translated and edited by Dr. G. E. DAY, F.R.S. *The first volume of this work is out of print.* The 2nd and 3rd vols., demy 8vo, cloth, 7*s.* each.

DR. OTTO FUNKE'S ATLAS OF PHYSIOLOGICAL PLATES. 7*s.*

HARRISON AND SONS,

BOOKSELLERS TO HER MAJESTY AND H.R.H. THE PRINCE OF WALES.
